### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 15, 18, 20, 21, 22, 23, 24, 25, 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Lechman. The patent to Lechman teaches structure as claimed including a desk body comprising a front panel, a back panel, right and left panels, bottom panel (figs. 1-2), the panels in combination defining an enclosed desk volume (figs. 5, 6), a desk top (14) mounted to the desk body defining a writing surface which defines a transparent region, elements of the computer disposed within the enclosed desk volume (fig. 2), a computer display (figs. 10, 12), the display parallel and angular relationship to the plane of the writing surface

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 19 is rejected under 35 U.S.C. 103(a) as being unpatentable over in view of Lechman in view of Schairbaum. The patent to Lechman teaches structure substantially as claimed, as discussed above including a desk body comprising a front panel, a back panel, right and left panels, bottom panel (figs. 1-2), the panels in combination defining an enclosed desk volume (figs. 5, 6), a desk top (14) mounted to the desk body defining a writing surface which defines a transparent region, elements of the computer disposed within the enclosed desk volume (fig. 2), a computer display (figs. 10, 12), the display parallel and angular relationship to the plane of the writing surface, the only difference being that the legs are not adjustable. However, the patent to Schairbaum teaches the use of providing at least one adjustable leg structure. It would have been obvious and well within the level of one having ordinary skill in the art to modify the structure of Lechman to include adjustable leg structure to provide ergonomics, as taught by Schairbaum since such structures are conventional alternative structures used in the same intended purpose, thereby providing structure as claimed.

***Allowable Subject Matter***

Claims 1-14 are allowable over the prior art of record.

Claims 16, 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

Applicant's arguments filed 10/03/03 have been fully considered but they are not persuasive.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
